PROVINCIAL LAND USE COMMITTEE

OF CABINET

SEPTEMBER 22, 1988

Manitoba

Crown Land Classification Committee

Terms of Reference & Mandate

CROWN LAND CLASSIFICATION COMMITTEE

TERMS OF REFERENCE AND MANDATE

BACKGROUND:

The Crown Land Classification Committee was established in 1975 by the Premier of the Province to be responsible for Crown land planning in southern Manitoba. In 1978, the CLCC became a subcommittee of the Provincial Land Use Committee of Cabinet with added responsibilities for Agricultural Crown land sales and Crown land exchanges.

All decisions of the Committee are now made within the scope of guidelines and policies approved by the Provincial Land Use Committee of Cabinet (Figure 1.).

Committee Structure:

There are 8 regular members, 2 from Manitoba Agriculture, 3 from Natural Resources, 1 from Northern Affairs, 1 from Municipal Affairs and 1 from Environment. All members are appointed by the respective departments. The regular members are:

- R. Thomasson, Natural Resources, Chief, Land Planning, Communications, Economics and Planning - Chairman
- G. Lahaie, Agriculture, Chief, Agro-Land Planning and Management, Agricultural Crown Lands - Vice-Chairman
- J. Whiting, Municipal Affairs, Director, Municipal Planning
- D. Rannard, Natural Resources, Director, Forestry
- B. Gillespie, Natural Resources, Chief of Habitat Management, Wildlife
- G. Somers, Agriculture, Head, Land Planning and Development, Soils and Crops
- R. Mayer, Northern Affairs, Land Use Planner, Research and Planning
- To Be Named, Environment, Workplace Safety & Health

In respect of the Committee's responsibilities for the sale of agricultural Crown lands and the possible exchange of Crown land, the Director of Lands, Natural Resources, R. Winstone also sits on the CLCC.

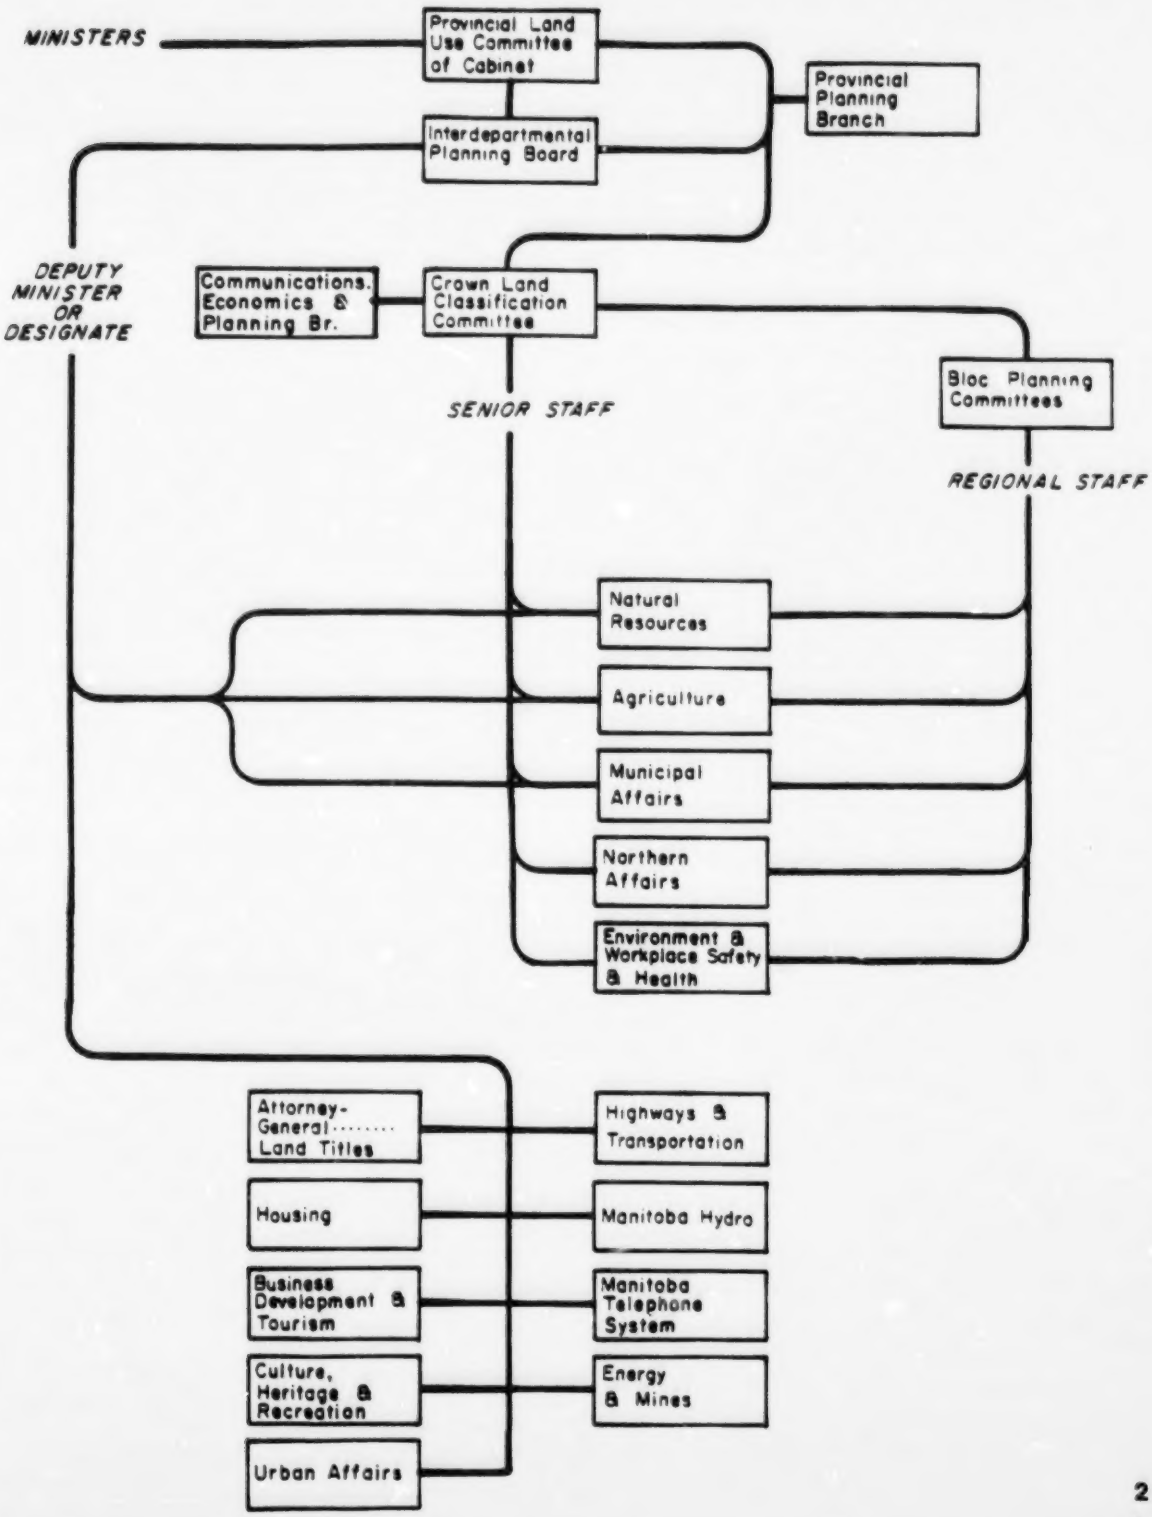
The Committee's Secretary/Crown Land Co-ordinator is W. Barto, Natural Resources, Chief, Resource Planning, Communications, Economics and Planning.

Manitoba Natural Resources, Communications, Economics and Planning Branch,provides the CLCC with its planning, management and support staff including a general operating budget. Supplemental fiscal support is provided by the departments on a project basis.

Figure 1. Organizational Chart

Crown Land Classification Committee

Southern Crown Land Planning Program



Bloc Planning Committees (BPCs):

The CLCC established in 1976 a regional planning structure which included the creation of local Bloc Planning Committees. Reporting and responsible directly to the CLCC, the eight BPCs (Map 1);

1) provide field and regional Crown land use classification recommendations and

2) within the scope of guidelines established by the CLCC represent the Committee in the region.

The BPCs are composed of regional specialists from Manitoba Agriculture, Natural Resources, Municipal Affairs, Northern Affairs and Environment.

The duties and responsibilities carried out by the various BPCs are fundamental and essential to the entire Crown land planning program.

Crown Land Planning Process:

At the direction of PLUC, the CLCC established a Crown land planning program which ensures that all Provincial Crown land plans prepared by the CLCC are reviewed by regional staff, local municipal authorities, and all departments and agencies of government through IPB prior to approval by the Provincial Land Use Committee of Cabinet.

Provincial plans are policy documents which describe provincial land use intent. In concert with these plans, the CLCC maintains detailed operational plans which are used in the day-to-day administration of Crown land.

Both the Provincial and operational plans use a standardized, open-ended land use classification system which ensures uniformity and consistency of land use intent, administration and management across southern Manitoba.

To date PLUC has approved 14 Provincial Crown land plans. There are 3 draft plans under review by local authorities and 22 new areas under study (Map 2).

The CLCC has classified all 14.1 million acres of Crown land in its area of jurisdiction and publishes yearly an updated "Interdepartmental Operational Crown Land Plans Report."

Major Crown Land Allocations by Order-in-Council:

The CLCC is responsible for reviewing and making recommendations to PLUC respecting the designation of Crown lands to Provincial Forest, Community Pasture, Provincial Park, Wildlife Management Area and Ecological Reserves in southern Manitoba.

To date the CLCC has recommended and PLUC has approved the establishment of one new provincial park, 21 new wildlife management areas, additions to 19 existing WMAs, four new and additions to four provincial forests, and four new ecological reserves (Appendix 1).

Agricultural Crown Land Sales:

When it became government policy to sell Crown land under agricultural lease, the Provincial Land Use Committee of Cabinet was identified as the authority for determining sale suitability within a broad government policy framework. As stated in policy (Appendix 2):

> "The sale of Crown land must not adversely affect the public interest, i.e., the land must not be required for government use and does not require protection as defined by PLUC policy; including but not limited to:
> - required for future highways, Hydro ... purposes;
> - required for resource management and development including wildlife, forestry, fisheries, (etc.) ...
> - requires protection due to instability (flooding, bank slippage), erosion, fragility (marshes) ...
> - ecologically significant areas; ... Order-in-Council areas;
> - ... significant shorelands, (and certain specifically defined) recreational lands (including) CL1 classes 1, 2, 3 ... (and the)
> - ... land use must conform to local planning schemes and have approval of the Municipality, Planning Board and the Watershed Board ..."

The CLCC is charged by PLUC with implementing this aspect of the sale program. Under existing procedures, all possible sales are reviewed by government departments and local municipal authorities (Appendix 3). Comments from all sources are subsequently reviewed by the CLCC.

1) If there are no concerns raised, the CLCC approves the sale and advises Manitoba Agriculture and Natural Resources who then proceed to process the sale, i.e., appraise the land, make an offer to purchase, transfer title, etc.

2) If there are concerns and these concerns are within the policy guidelines approved by PLUC, the CLCC rejects sale and the applicant is so advised. At this time, the applicant, is also informed that he may appeal this decision.

3) Upon receipt of an appeal, the CLCC will review the appeal with the objecting agency and will either approve the sale or prepare for PLUC an appeal report for review. PLUC is the final appeal body, and all decisions of PLUC are final.

To date, within the context of the broad suitability criteria, the CLCC has confirmed with PLUC some 38 specific reasons for rejecting sales (Appendix 4), for example:

- Crown lands subject to flooding where the frequency of flooding is less than 2 years along a stream, 5 years along a river and 10 years adjacent to a lake, or Crown lands with major drainage problems, or Crown lands identified as Class 1 wintering wildlife habitat are not sold.

As of March 31, 1988, the CLCC has approved the sale of 1,330 parcels (189,017 acres) of Crown land and disapproved 596 parcels (72,011 acres). There has been a steady decline in the number of parcels requested for sale since the program began in late 1979 (Figures 2, 3, Map 3 and Table 1).

Number of Parcels	54	93	147

TERMS OF REFERENCE AND MANDATE OF THE CROWN LAND CLASSIFICATION COMMITTEE-APPROVED SEPTEMBER 22, 1988 BY THE PROVINCIAL LAND USE COMMITTEE OF CABINET

1. *The Crown Land Classification Committee will report to and receive its direction from the Provincial Land Use Committee of Cabinet in accordance with established responsibilities and policies.*

2. *The existing structure of the Crown Land Classification Committee will include 2 members from Manitoba Agriculture, 3 from Natural Resources and 1 member each from Municipal Affairs, Northern Affairs and Environment. The regional planning structure involving Bloc Planning Committees will continue to report to the CLCC.*

3. *The CLCC will be responsible for Crown Land Planning, i.e. preparation and maintenance of Provincial and Operational Crown land plans in southern Manitoba and specified areas of Northern Manitoba (Appendix 5).*

   - *all Provincial Crown land plans and amendments will be reviewed by the local authority (Council or Planning District) and the Interdepartmental Planning Board (Appendix 6),*

   - *where an amendment to a provincial plan has been approved by the local authority, IPB, and CLCC, implementation of the amendment may occur prior to referral to PLUC,*

   - *the Provincial and Operational Crown Land Use Classification System will continue as the methods for systematically recording and describing Crown land use (Appendix 7 and 8).*

4. *The CLCC will be responsible for advising PLUC on the establishment of Provincial Forests, Parks, Ecological Reserves, Wildlife Management Areas and Community Pastures in southern Manitoba.*

   - *proposed order-in-council areas (Parks, Forests, etc.) will be reviewed by the local authority, IPB and any affected lessee (Appendix 9).*

   - *where there are existing agricultural leases or permits involved, agricultural use by the existing lessee or permittee shall continue until the existing legal obligation expires, that is the lease or permit is surrendered, and that in-family transfers are accepted as a continuing legal commitment.*

5. *The CLCC will be responsible for reviewing all agricultural Crown land sales and exchanges within the policy guidelines of PLUC.*

   - *The CLCC will approve all sales and exchanges where no valid objection or concern has been raised and will disapprove all sales and exchanges which contravene PLUC policy.*

   - *The CLCC will review all appeals and where policy does not allow sale, the CLCC will prepare an appeal report for PLUC consideration and a final decision.*

6. *The CLCC will be responsible for the development of Crown land use policy for southern Manitoba.*

7. *The Provincial Land Use Committee of Cabinet will continue as the approving authority for provincial Crown land plans and amendments, proposed order-in-council areas (e.g. Parks, Forests, WMAs, etc.) and Crown land use policy.*

   - *The Chairman of PLUC may approve on behalf of PLUC, Provincial Plans, and amendments and order-in-council areas where no concerns or objections have been raised.*

8. *The Provincial Land Use Committee of Cabinet will continue as the appeal authority for the Agricultural Crown Land Sale program.*

Crown Land Classification Committee
POLICY & PROCEDURES MANUAL

Chapter ..... XIV. AGRICULTURAL CROWN LAND SALES

Section ..... A. Policy: Sale of Agricultural Land Under Crown Lease

A. PURPOSE

To enable the sale of agricultural Crown lands that were under a long term lease to the existing Lessee, or where the Lessee received the lease via an In-family Transfer.

B. AUTHORITY

Chapter C340 - The Crown Lands Act - Section 7(1): "The Lieutentant Governor in Council may (a) determine the limits to be placed upon the price of Crown lands and the terms and conditions of sale and of payment, . . ."

Note: (1) The ministerial authority to sell land under the above is with the Minister of Natural Resources.

(2) The ministerial authority to administer agricultural leases is with the Minister of Agriculture.

Therefore: The actions taken to sell agricultural Crown land is a co-ordinated effort between the two ministers.

C. GENERAL CONDITIONS

I. Eligibility of Purchaser

1. The purchaser must qualify under The Crown Lands Act and the Agricultural Lands Protection Act.

2. The applicant must have held the land under a long term lease for at least two years prior to the date of transfer in order to be eligible to buy the land.

3. The Province reserves the absolute right to refuse a land sale if the applicant is no longer an eligible lessee at the time of title transfer.

II. Suitability of Land

1. The Provincial Land Use Committee of Cabinet will be the authority for the Agricultural Land Sales Program.

2. The Crown land must be agriculturally useable and generally have an agricultural capability of Class 5 or better.

3. The sale of Crown land must not adversely affect the public interest, i.e., The land must not be required for government use and does not require protection as defined by PLUC policy; including but not limited to the following:

   a) required for future Highways, Hydro, MTS, etc., purposes;

   b) required for resource management and development, including wildlife, forestry, fisheries, recreation, historical/ archaelogical, mineral and watershed protection;

   c) require protection due to instability (flooding, stream bank slippage), erosion (wind or water), fragility (marshes, etc.);

   d) ecologically significant areas;

   e) lands required due to legislative or legal designation (areas designated by Order-in-Council, licensed areas, etc.).

4. Agricultural Crown Lands which contain within their boundaries or are adjacent to waterways, waterbodies and shorelands of public significance shall not be sold.

5. The Crown land must not be required for government use or public recreational development, i.e., Crown lands with the following characteristics:

   a) Canada Land Inventory outdoor recreation lands Class 1, 2 or 3 shall not be sold.

   b) Shorelands which have important/priority recreational significance which may not be Class 1, 2 or 3 i.e., points of land, islands less than 250 acres and natural harbours, shall not be sold.

   c) Natural features of Provincial or regional significance, i.e., waterfalls, unique rock formations, significant vegetative features shall not be sold.

d) Crown lands which are presently being utilized for intensive recreational purposes by local residents on an informal basis shall not be sold, i.e., locally used beaches (of Class 4, 5, 6 or 7).

e) Crown lands classed as having low recreational capability but suitable for and having some probability of cottage development in the future because it is located in proximity to existing recreational developments, shall not be sold, i.e., the Crown land parcel must be capable of having 5 or more cottage lots.

f) Agricultural Crown lands which have limited recreational value but are adjacent to existing recreational developments or high recreational capability lands shall not be sold if it can be shown that development of the land for agricultural or other uses would degrade or negatively impact on the adjacent recreational lands.

g) Agricultural Crown lands with limited recreational value shall not be sold if the sale would restrict public access to important recreational lands.

h) Agricultural Crown lands identified by Parks Branch, as being required for present or future park, recreational or cottage development, shall not be sold.

6. The sale must be for a land use that conforms to local planning schemes and plans and must have the approval of the Municipality, the Planning District Board and the Watershed Board, where applicable. Any rejection from these local authorities must be based on land use or land servicing concerns.

III. Amount of Land That Can be Sold to One Applicant

1. The home quarter can be sold without restriction concerning the size of the land holdings and generally without restriction respecting the land capability unless the land use limitations are severe and hazardous.

2. The amount of Crown land for sale to one applicant is limited to 960 acres or six parcels of land (quarter sections or fractions thereof), whichever is the lesser. Any request to purchase Crown lands that would result in an aggregated purchase exceeding this amount since

June 1, 1979 will be subject to Provincial Land Use Committee (PLUC) review, based on soil productivity classification and on economic need.

3. Family units, partnerships or farm corporations involving several members will be eligible to purchase up to 960 acres or six parcels of land (quarter sections or fractions thereof), whichever is the lesser. Any request to purchase Crown lands that would result in an aggregated purchase exceeding this amount since June 1, 1979 will be subject to PLUC review.

IV. Conditions of Sale

1. The land will be sold for cash at the time of sale, or in the case of term sale, the sale account may be transferred to the Manitoba Agricultural Credit Corporation subject to such terms and conditions as are agreed to by the Ministers of Natural Resources and Agriculture.

2. In cases where there are land improvements paid for by the Province, the sale price shall be equal to, or greater than, the raw land value, plus the amount of the capital invested by the Province in the improvements.

3. In the case where the improvements were paid for by the lessee, the lessee shall be credited for the improvements; however, the purchase price of the land shall not be less than the raw land value of similar property.

4. All agricultural Crown land purchase requests for agricultural use received subsequent to the approval of this policy paper will be subject to an agreement to be filed as a caveat in series with the title, whereby the purchaser agrees that if resale occurs within the first three years following the land transfer, any increase in value over the full appraised value of the land at the time of purchase will be shared with the Province on the basis of the following sliding scale:

   a) Immediate resale (during first 12 months) - all capital gains will accrue to and be payable to the Province.

b) After one year (12 months + 1 day to the end of 24 months) - 66 2/3% of the capital gains will accrue to and be payable to the Province and 33 1/3% will accrue to the seller.

c) After two years (24 months + 1 day to the end of 36 months) - 33 1/3% of the capital gains will accrue to and be payable to the Province and 66 2/3% will accrue to the seller.

d) After three years - all capital gains will accrue to the seller.

5. The Province reserves the right to issue conditional titles or to require special agreements to be filed as caveats against the land to protect the Crown against adverse claims that were unforseen at the time of sale and to ensure such rights as may be determined by Cabinet from time to time to provide such things as:

a) the right of repurchase, at a fixed price, of land required for public works such as roads, drains, etc.

b) the right to preserve public access for hunting, fishing or other outdoor recreation.

POLICY & PROCEDURES MANUAL

Chapter ..... XIV. AGRICULTURAL CROWN LAND SALES

Section ..... D. Reasons for Rejecting Sales (To January 1, 1986)

A. DISAPPROVED BY A LOCAL PLANNING AUTHORITY

1. Crown land disapproved for sale by the Local Council or Planning District Board.

2. Crown lands disapproved for sale by the Watershed Conservation District Board.

B. CROWN LANDS WITH LOW AGRICULTURAL POTENTIAL

3. Crown lands with C.L.I. capability of Class 6 or 7 for agriculture.

C. REQUIRED FOR PUBLIC PURPOSES

4. Crown lands identified for future highway purposes; sand, gravel, granular sources, road re-location, borrow material, or highway widening.

5. Crown lands identified within the Lake Winnipeg Water Power Storage Reserve, McArthur Water Power Licence Area, proposed Dauphin River Water Storage Reserve.

6. Crown lands identified for water works purposes (e.g., located along the Portage Diversion, adjacent to overflow reach of the Diversion, water works rights-of-way, flood control works Garden on Floodway).

7. Crown lands under study, and may be required for future water control works.

8. Crown lands required for future local government purposes, i.e., nuisance grounds, waste storage area.

D. REQUIRES PROTECTION DUE TO INSTABILITY, EROSION, FRAGILITY, HAZARD, ETC.

9. Crown lands subject to flooding by a less than two year flood along a stream where flooding seldom extends into the growing season, would not be available for sale.

10. Crown lands subject to flooding by less than a five year flood along a stream where flooding frequently extends into the growing season, would not be available for sale.

11. Crown lands adjacent to lakes would not be approved for sale where the frequency of flooding is estimated to be 10 years or less.

12. Crown lands identified as within Polder III, Pasquia which has a history of flooding. Located near the water retention area with elevations below the full supply levels of the retention site.

13. Crown lands identified as a water catchment or retention area.

14. Crown lands identified for watershed management and protection.

15. Crown lands identified as marsh or bog or fen or slough.

16. Crown lands identified as subject to potential excessive erosion (e.g., steep slopes; bank instability; soils in the dune phase, complex topography, i.e., escarpment areas).

17. Crown lands to be retained for the protection of water quality and supply of downstream users.

18. Crown lands to be retained because of potential downstream flooding problems.

19. Crown lands identified as subject to localized flooding.

20. Crown lands with a major drainage problem (e.g., part of an area which is basin like and until drainage can be installed should not be sold).

21. Crown lands identified as requiring road and drainage infrastructure and to difficult and costly to install.

E. REQUIRED FOR RESOURCE MANAGEMENT PURPOSES

Fisheries

22. Crown lands identified for fisheries habitat protection, that is protection of spawning habitat, nursery areas protection against silt and nutrient loading (e.g., Mantagao River System, Point River, Red Deer Lake, German Creek, Waywayanagan River and Pine River Marsh, Garland Creek, Assiniboine River).

Chapter ..... XIV. AGRICULTURAL CROWN LAND SALES

Section ..... D. Reasons for Rejecting Sales (To January 1, 1986)

Forestry

23. Crown lands identified for forestry purposes (e.g., Class 4 white spruce site, tree plantation).

24. Crown lands identified as a possible addition to a Provincial Forest (e.g., Spruce Woods).

25. Crown lands identified as an island which have value as a forestry seed source in case of forestry disaster.

Mines

26. Crown lands identified as having mineral potential (e.g., potential quarrying sites-dolomite; area provides aggregate material at a lower cost; industrial minerals source of high potential).

Recreation

27. Crown land identified for expansion of recreational park.

28. Crown lands identified as an island with recreational value.

29. Crown lands identified for cottage development.

30. Crown lands identified as having potential archaeological significance.

31. Crown lands identified as Class 2 recreational shoreline.

32. Crown lands identified as Class 3 recreational beach.

Wildlife

33. Crown lands identified as wildlife priority areas, that is habitat protection, high production areas etc. includes wildlife project areas (e.g., Ducks Unlimited Projects), high potential waterfowl production areas, areas of high deer counts, CLI Class 1, 2 or 3 wildlife habitat wintering areas, area of good furbearer production (e.g., muskrat), wildlife travel corridors, waterfowl staging area, excellent upland game habitat, migratory staging areas.

34. Crown lands identified as a possible Wildlife Management Area or addition to a WMA is a WMA or Public Shooting Ground.

35. Crown lands purchased for wildlife habitat and provincial forest boundary adjustments.

F. CROWN LANDS TO BE RETAINED DUE TO ACCESS CONCERNS

36. Crown lands required for access to other lands or to shorelands for public use.

37. Crown lands identified as lacking sufficient physical road access.

G. CROWN LANDS IDENTIFIED FOR HIGHER AND BETTER PURPOSES

38. Crown lands identified as prime commercial/industrial site.

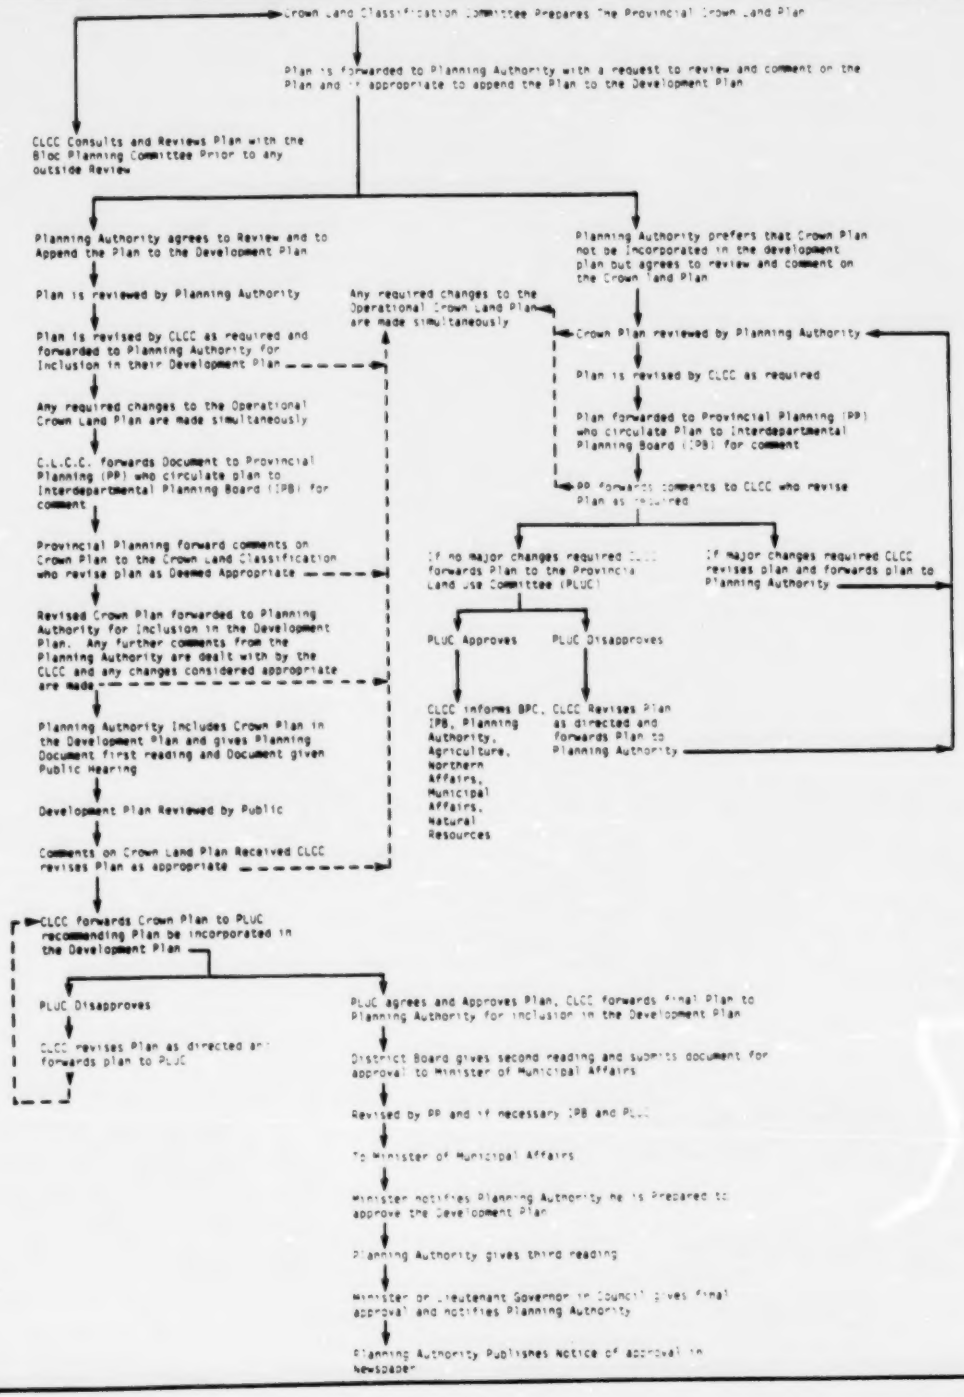
POLICY & PROCEDURES MANUAL

Chapter ..... XIII. GENERAL PROCEDURES - GUIDELINES

Section ..... 1. Approval Procedure for Provincial Crown Land Plan and Amendments: Where a Development Plan is Being Prepared.



Crown Land Classification Committee Prepares the Provincial Crown Land Plan
Plan is forwarded to Planning Authority with a request to review and comment on the Plan and if appropriate to append the Plan to the Development Plan
CLCC Consults and Reviews Plan with the Bloc Planning Committee Prior to any outside Review
Planning Authority agrees to Review and to Append the Plan to the Development Plan
Plan is reviewed by Planning Authority
Plan is revised by CLCC as required and forwarded to Planning Authority for Inclusion in their Development Plan
Any required changes to the Operational Crown Land Plan are made simultaneously
C.L.C.C. forwards Document to Provincial Planning (PP) who circulate plan to Interdepartmental Planning Board (IPB) for comment
Provincial Planning forward comments on Crown Plan to the Crown Land Classification who revise plan as Deemed Appropriate
Revised Crown Plan forwarded to Planning Authority for Inclusion in the Development Plan. Any further comments from the Planning Authority are dealt with by the CLCC and any changes considered appropriate are made
Planning Authority Includes Crown Plan in the Development Plan and gives Planning Document first reading and Document given Public Hearing
Development Plan Reviewed by Public
Comments on Crown Land Plan Received CLCC revises Plan as appropriate
CLCC forwards Crown Plan to PLUC recommending Plan be incorporated in the Development Plan
PLUC Disapproves
CLCC revises Plan as directed and forwards plan to PLUC
Any required changes to the Operational Crown Land Plan are made simultaneously
Planning Authority prefers that Crown Plan not be incorporated in the development plan but agrees to review and comment on the Crown Land Plan
Crown Plan reviewed by Planning Authority
Plan is revised by CLCC as required
Plan forwarded to Provincial Planning (PP) who circulate Plan to Interdepartmental Planning Board (IPB) for comment
PP forwards comments to CLCC who revise Plan as required
If no major changes required CLCC forwards Plan to the Provincial Land Use Committee (PLUC)
If major changes required CLCC revises plan and forwards plan to Planning Authority
PLUC Approves
PLUC Disapproves
CLCC informs BPC, IPB, Planning Authority, Agriculture, Northern Affairs, Municipal Affairs, Natural Resources
CLCC Revises Plan as directed and forwards Plan to Planning Authority
PLUC agrees and Approves Plan, CLCC forwards final Plan to Planning Authority for inclusion in the Development Plan
District Board gives second reading and submits document for approval to Minister of Municipal Affairs
Revised by PP and if necessary IPB and PLUC
To Minister of Municipal Affairs
Minister notifies Planning Authority he is Prepared to approve the Development Plan
Planning Authority gives third reading
Minister or Lieutenant Governor in Council gives final approval and notifies Planning Authority
Planning Authority Publishes Notice of approval in Newspaper
